

JSS

JavaScript Studio

JSS

Application Builder for mobile platforms

Gateways to database, printers and PLCs.

JavaScript Studio (JSS) is a multi-platform Web application builder.

JSS uses JQuery and JQuery Mobile libraries allowing a top quality, native like, user interface on smartphone and tablets running the main OS (IOS, Android, Windows Phone, etc.).

JSS generated applications examples

JSS

JSS can be used by beginners and experts who want to create very fast their projects. In expert mode, Html and Javascript code can be modified. The generated code can be reused on a system host different than JSS.

JSS integrated advanced UI like JQuery Knob and jqPlot.

JSS runs on Windows XP, VISTA, 7 an 8 on 32 and 64 bits versions
